# *Guarantee*

"METALCRAFTS" hereby guarantees that every cast bronze grave marker, tablet, nameplate, character, and emblem bearing the "METALCRAFTS" MARK OF MERIT is executed in strict compliance with the following specifications:

 The bronze rigidly complies with the specifications of the U. S. Bureau of Standards, i. e.,

85% copper	5% tin
5% zinc	5% lead

 The copper content is VIRGIN copper, and not scrap metal, so-called copper alloys or "mixes," or "re-melts."

 The castings are made by the French-sand process, and are heavy, solid castings of the finest quality, free from pits, blow holes, and minute cracks.

 The work is hand-tooled (or chased) by master craftsmen, the very best of the skilled artisans whose services have been secured from a conscientious combing of the U. S. A. (This chasing is necessary to remove small particles of bronze which adhere to the castings when they are withdrawn from the sand moulds, and to give sharp, clear definition.)

 The work is invariably and without exceptions OXIDIZED (not painted or otherwise "doped") to insure the long life of the background coloring. Borders, letters and other raised portions are burnished to a high gloss, after which the work receives not less than four coats of finest transparent lacquer to preserve the finish.

 All work is in all respects EQUAL TO THE FINEST produced anywhere.

WITH VASE INVERTED

—8— “*Metalcrafts*” of Cincinnati —8—

No. 610

A new and exceptionally beautiful design. A conventionalized floral garland forms the border motif.

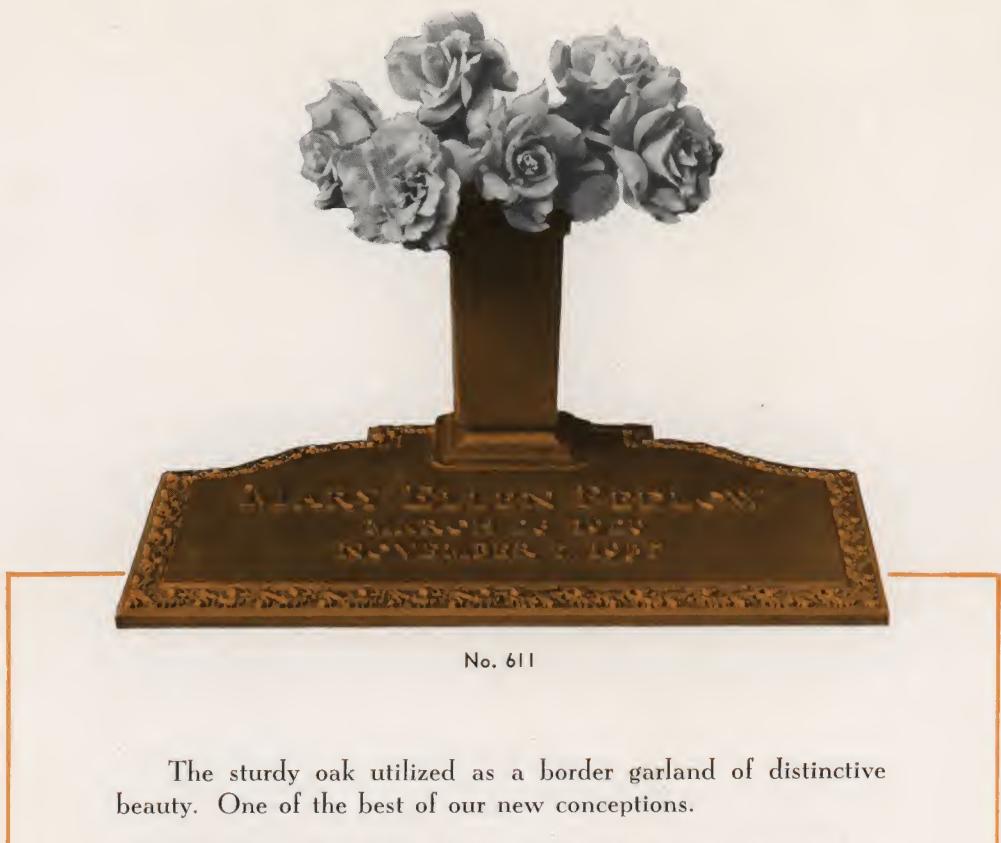

The body of the cast bronze fan-shaped vase measures 8" high by 9½" long by 1¾" wide at the lip, and it has been designed particularly for the reception of a bouquet of the larger flowers with long stems and considerable foliage.

The base plate is handsomely sculptured in low relief and has squared edges instead of the customary bevel. Size of the marker: 14 x 24 inches.

No. 610—WITH VASE INVERTED

→———— “*Metalcrafts*” of Cincinnati ←————→

The sturdy oak utilized as a border garland of distinctive beauty. One of the best of our new conceptions.

The square cast bronze flower urn has been originated in response to a demand for a tall, commodious vase to accommodate plenty of large flowers with long stems. Dimensions of the vase proper:  $3\frac{1}{4}$  by  $4\frac{1}{4}$  by  $8\frac{1}{4}$  inches, measured at the lip.

The marker itself is an artistic creation with a universal appeal.

Size of the base plate: 14 x 24 inches.

No. 751

Our newest creation is this beautiful grave marker, designed to harmonize with the landscaping of any cemetery.

The rough bark faithfully reproduced on the long slope of the bevel is pleasingly repeated on the flower vase. (An exclusive "Metalcrafts" feature.)

The background is genuine hand-thumbed, giving that artistic roughness to the top of the marker which is essential to its proper blending into the border motif.

Over all size of the marker: 14 by 24 inches.

The vase has been especially designed to accommodate a bouquet of large flowers with long stems and considerable foliage. It measures 3 1/4 by 4 1/4 by 8 1/4 inches, at the lip.

MARKER No. 750      BASE No. 752

The very newest in grave marker designs: A genuine hand-thumbed background, merging into the rough bark of the bevel.

Our No. 750 plate mounted on our No. 752 base forms an ensemble of rare and everlasting beauty.

**No. 750**—This is an artistic 12 by 24-inch cast bronze marker which may be utilized as pictured, or on a marble or granite base.

**No. 752**—This cast bronze base (or form) is 3½ inches high at the front, sloping to 5 inches high at the rear.

## The Eterna-Safe

The Eterna-Safe is a positively everlasting bronze receptacle, in which photographs, valuable records, or treasured belongings of the departed may be sealed for the duration of time. It is cast integral on the back of the marker, where its presence is unsuspected by any but the surviving loved ones.

The Eterna-Safe provides a secure depository for a biography of the deceased, historical and genealogical records, rings, fraternal emblems or pins, toys, a diary, or legal documents. Or it may well be utilized as a casket or urn to house the ashes of the deceased forever.

## *To Determine Sizes*

The prices quoted on page 36 are for grave markers having the inscription in any of the four styles of letters illustrated above. (Unless otherwise specified, markers and tablets are set up in Runic No. 7 letters.) Ten letters will occupy spaces as listed below, each punctuation mark and each space between words counting as one letter:

"Metalcrafts" of Cincinnati

We feature four different types of vases which may be applied to any of our bronze markers 14" x 24" or larger, if the design permits and there is not less than a five-inch diameter space to receive the base of the vase without crowding the inscription. The extra charges are as follows:

Cast (see page 2) .....	\$16.00
Spun (see page 8) .....	12.00
Cast, flush-type .....	16.00
Cast, floral design (see page 5) .....	20.00

Extra for casting name and two dates on bottom of vase, \$3.00.

Vases are securely attached to markers by means of heavy brass chains.

When the marker is mounted on a sloping stone, upon request and without extra charge we will supply the vase with special base, so that the vase will be level. See No. 741, page 2.

All prices are f. o. b. Cincinnati. Necessary fastening bolts are included without charge.

Unless otherwise stipulated we supply markers with inscriptions in flat face Runic No. 7 letters.

The average shipping weight is 12 pounds to the square foot.

All prices are based on an inscription of not more than 35 letters (except that double-grave markers may have up to 75 letters thereon.) When extra letters are required, add eight cents per letter for each additional letter.

**Finishes:** Unless otherwise specified, we finish all markers with all raised portions and bevels highly polished, and backgrounds dark oxidized. However, you may have a natural statuary bronze finish, if you prefer, or an acid-etched verde (green) antique.

If it is desired that the date of death be added later, we recommend that this be accomplished by means of a cast plate 1" x 6 3/4" x 1/8", the cost of which is \$3.50. (If the design is to be neatly balanced, all dates should be on these small plates, and each plate will cost \$3.50).

**ALUMINUM MARKERS:** Any of our markers can be supplied in pure cast aluminum at the prices given below LESS TEN PER CENT.
